## DEFINITIONS

### TOTAL COST OF CARE (TCOC)

*Comparison of the average monthly cost for a commercially insured patient*

- Cost = (Payments by insurance + Patient copays + Patient deductibles) - Insurer discounts
- Values are adjusted for patient severity and risk
- Costs are for all costs, not just for the costs at the attributed medical group

### COST INDEX

*The ratio of risk adjusted cost of care to the market average (1.00)*

### PRICE INDEX

*Relative comparison of price per unit for a commercially insured patient after insurer discounts are applied*

- A value above 1.00 (market average) indicates higher prices
