DEFINITIONS

TOTAL COST OF CARE (TCOC)

Comparison of the average monthly cost for a commercially insured patient

- Cost = (Payments by insurance + Patient copays + Patient deductibles) - Insurer discounts
- Values are adjusted for patient severity and risk
- Costs are for all costs, not just for the costs at the attributed medical group

COST INDEX

The ratio of risk adjusted cost of care to the market average (1.00)

PRICE INDEX

Relative comparison of price per unit for a commercially insured patient after insurer discounts are applied

- A value above 1.00 (market average) indicates higher prices
