

# A New Approach for Data Sharing Among Health Care Payers and Providers

JANUARY 13, 2021

# Welcome!

Thanks for joining us today.

All webinar participants are in “listen-only” mode. To ask a question, please use the “Q&A” box at the bottom of your screen.

MNCM will send a link to presentation slides and the recording to webinar attendees by early next week.

# MNCM Presenters/Staff

Liz Cinqueonce  
Chief Operating Officer

Collette Cole  
Clinical Measure  
Developer

Gunnar Nelson  
Health Economist  
Director of Data Analytics

Amy Krier  
Technical Project  
Manager

# Agenda

---

- Project Background
- Overview of Two Standards
  - Provider-to-Payer
  - Payer-to-Provider
- Approach for Pilot Testing
- Q & A

We can make health care  
more affordable by making it better.

We need better health care  
information to get there.

# Project Background

- 2017 – Board identified **data related barriers** as a **challenge to value-based care**

*Can MNCM play a role in helping to solve them?*

- 2018 – **Environmental scan** to dig deeper on the issues

*Health plans, Medicaid, health care providers*

# Environmental Scan Findings

- Universal acknowledgement that **variation in data sharing was problematic**
- Common concern about **impact on patient care and quality**
- Common desire to **improve usefulness and ability to act on the data**

# Environmental Scan Findings

## Common Goals:

- Improve quality and population health management
- Enhance performance on contracts & reduce TCOC

## Complimentary Payer Goals:

- Reduce practice variation on quality
- Reduce waste and improve efficiency

## Complimentary Provider Goals:

- Use data to target use of limited resources
- Integrate data to make information actionable

# New Workgroup Chartered in 2019

Common  
Health  
Information  
Reporting  
Partnership

# Who is involved?

## Payers

Blue Cross Blue Shield of MN  
HealthPartners  
Medica  
PreferredOne  
UCare  
MN Medicaid  
PrimeWest

## Providers

Allina  
CentraCare  
Entira  
Essentia  
Fairview  
Mayo Clinic  
Mankato Clinic  
MN Association of Community  
Health Centers  
North Memorial

## Other Stakeholders

MHA  
MMA  
MN Council of Health Plans  
MN Health Action Group  
Consumers  
MN Department of Health

# Address Needs, Solve for Pain Points

## Health Care Payers

- Timely, actionable, consistent and complete data about members
- Help them achieve signal strength needed to advance goals for improvement

## Health Care Providers

- Timely, actionable, consistent, and complete data about patients
- Help create efficiency by standardizing requests and formats for clinical data sharing

## Patients/Members

- Right care, right time
- Prevent missed and unnecessary screenings due to information gaps
- Flag appropriately for care management based on risk/needs

# CHIRP Workgroup Recommendations

- Focus on person-level data sharing and develop common standards for:
  - Payer-to-provider data sharing
  - Provider-to-payer data sharing
- Include support for implementation:
  - Education, training, technical assistance
  - Optional technology support

# Ongoing Vision for CHIRP

- Intended to be an ongoing partnership
- A forum for collaboration – to establish uniformity, set priorities, adjust over time
- Focused on person-level data sharing among payers and providers
- Used for population health management and quality improvement

# Technical Advisory Group Chartered

- Develop initial set of **common standards, processes, and mechanisms** for person-level data sharing
- Address **a core set** for two types of data:
  - Claims-based data shared by payers to providers
  - Clinical data shared by providers to payers

# Project Timeline

## Conceptualization

### Strategic Planning

Board identified data-related barriers to advancing value-based care as an emerging problem.

Can MNCM help solve these issues?

### Research & Charter

Environmental scan to understand details of data challenges

Board adopted new strategic priority and chartered workgroup

## Development

### Recommended Action

Workgroup convened to identify potential solutions & recommend path forward

Technical Advisory Group (TAG) Chartered

### Standard Development

TAG completed work on common standards for person-level claims and clinical data sharing

Version 1 approved for pilot testing.

## Implementation

### Implementation

Pilot test and refine CHIRP data standards

Release of final v.1

Launch outreach, education, training, T/A

2017

2018

2019

2020

2021

# Provider to Payer Reporting

## Standardization of Clinical Data

# Data to Measures

Ok, now I've loaded all the enrollment information and paid claims for the last year into the software system

For each measure, what patients are missing information?  
Start with Breast Cancer Screening

Now, create reports for all the women ages 50 to 74 **without** a mammogram and **remove** those with a history of bilateral mastectomy

# Multiple Requests for Clinical Data

- Surveyed payers
- Many of the **same** clinical data elements are requested
  - ... but significant variation in the ask
- Pain point and inefficient use of resources for medical groups

a1c  
blood pressure  
mammogram  
colonoscopy  
vaccinations  
pap smear  
retinal eye exam

# Evaluating Clinical Data Elements

Focused on data elements requested by 2 or more plans

Evaluate element against HEDIS measure specs

- almost all requested data elements related to a HEDIS measure
- plans are not asking for every data element; only missing “puzzle pieces”

Measures categorized by phase

- Phase One: ■ structured fields ■ occur in clinic ■ DDS
- Phase Two: ■ complicated ■ not likely in structured fields

Survey Said ...

# Phase One

Data Element	#	Measure/s
BMI	4	ABA
Height	4	ABA
Weight	4	ABA
Blood Pressure Systolic	4	CBP, CDC
Blood Pressure Diastolic	4	CBP, CDC
BMI Percentile	3	ABA, WCC
History of Bilateral Mastectomy	3	BCS
Mammography	3	BCS
HbA1C Test	3	CDC
HbA1C Value	3	CDC
Absence of Cervix	3	CCS
Cervical Cytology	3	CCS
hrHPV Test	3	CCS
Chlamydia Test	3	CHL
Colonoscopy	3	COL
CT Colonography	3	COL
FIT-DNA	3	COL
Flexible Sigmoidoscopy	3	COL
FOBT	3	COL
Childhood Immunizations x 12	2	CIS
Human Papillomavirus Immunization	2	IMA
Meningococcal Conjugate Immunization	2	IMA
Tobacco Use	2	MSC
Smoking Cessation Counseling	2	MSC

# Clinical Data Elements by CHIRP Phase

## Phase Two\*

Data Element	#	Measure/s
Nutrition Counseling	3	WCC
Physical Activity Counseling	3	WCC
Diabetic Retinal Screening	3	CDC
Advance Care Planning	3	COA
Functional Status Assessment	3	COA
Medication Review	3	COA
Pain Assessment	3	COA
Postpartum Visits	3	PPC
Nephropathy Monitoring- microalbumin	2	CDC
Nephropathy Monitoring- ACE/ARB date	2	CDC
Nephropathy Monitoring- ESRD	2	CDC
Nephropathy Monitoring- nephrectomy or tran	2	CDC
Nephropathy Monitoring- nephrologist visit	2	CDC
Prenatal Visits	2	PPC
PHQ-9 Summary Score	2	DMS, DRR
Medication Reconciliation	2	MRP
Annual Wellness Visit Notes	2	?

# HEDIS Measures by CHIRP Phase

## Phase One

- Adult BMI Assessment (ABA)
- Breast Cancer Screening (BCS)
- Cervical Cancer Screening (CCS)
- Chlamydia Screening in Women (CHL)
- Colorectal Cancer Screening (COL)
- Controlling High Blood Pressure (CBP)
- Comprehensive Diabetes Care (CDC) partial → A1c, BP
- Childhood Immunization Status (CIS)
- Medical Assistance Tobacco Cessation (MSC)

## Phase Two\*

- Care of Older Adults (COA)
- Comprehensive Diabetes Care (CDC) partial → retinopathy, nephropathy
- Depression (DMS), (DRR)
- Medication Reconciliation (MRP)
- Prenatal and Postpartum Care (PPC)
- Weight Assessment & Counseling (WCC)

\* many data elements not in structured fields/ technically unavailable and may not be feasible until process for electronic natural language processing available

# Planning for Standard File Layout

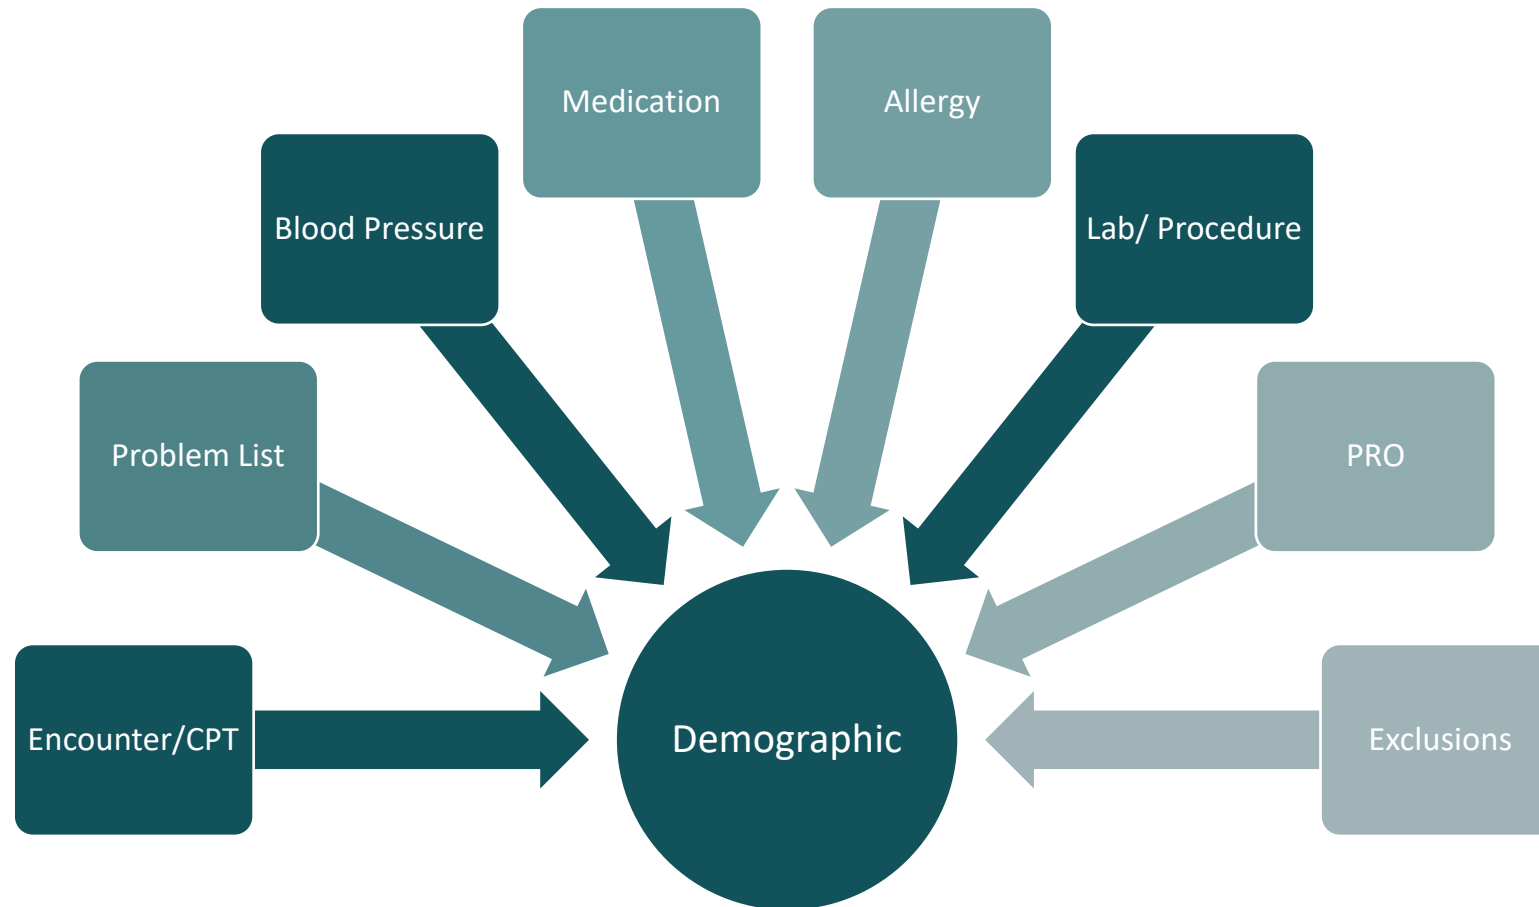

- As the TAG was starting to work on file layout/s
  - → realized that PIPE standard would fully meet this need!
- Structure already exists;
  - mapping created to submit **only** the data that is needed (not send the entire clinical data file)

## Options:

- MNCM can extract the data from PIPE on the group's behalf
- OR
- The medical group can follow the standard and send data

# PIPE Data Standard

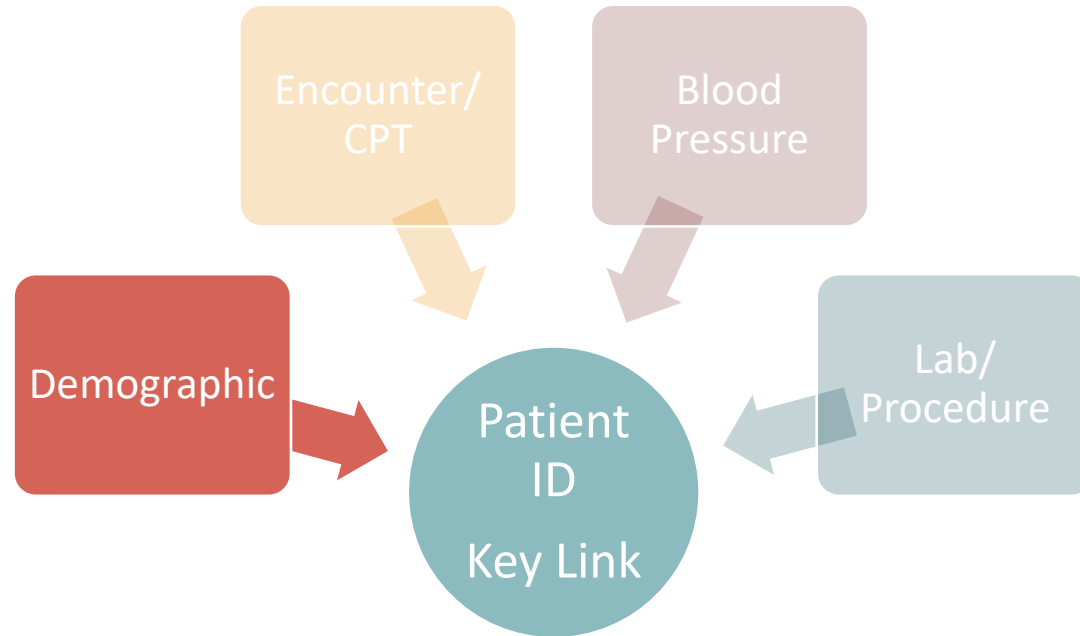

Process  
Intelligence  
Performance  
Engine

4 of 9 files  
Phase I CHIRP

[Realistic, but Fake Data]

# Results of Provider to Payer Standards

Standardization increases efficiency

PIPE can be utilized if desired, ↑↑  
efficiency

More timely exchange of clinical  
information = less “false” gaps, less  
chart chases

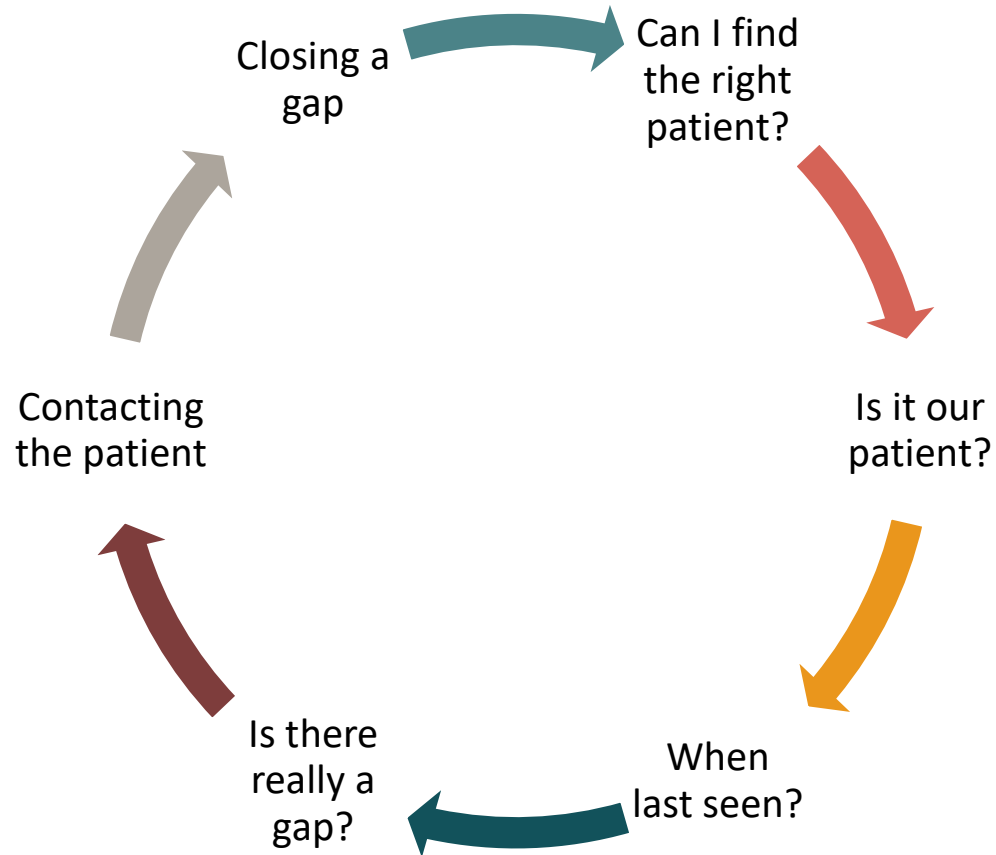

# Payer to Provider Reporting

## Standardization of Reports

# Data For Care Coordination

We were going to reach out to Sarah Johnson to encourage her to get her mammogram, now I see that she had it done last month down the street

# Background Payer to Provider Data

- Payers have a unique complete data set to share
- Everyone has the goals of better:
  - patient management
  - care coordination
  - health outcomes
  - control of costs
- It is difficult for providers to use the information
  - not standardized, can't combine the files
  - treat by condition, not by insurance plan

# Guiding Principles Payer to Provider Files

- Core is the ability for providers to use the information
  - common structure and format; first nth columns per file fixed
  - ability to **combine files** from multiple payers
- Customization of the files is an option
  - this is to occur at the end of the file, after standard structure
  - consideration to balance value and to not over-burden

## Goal

More timely exchange of information increases accuracy of identified potential “gap” and 1) reduces the chase 2) increases performance rates

# Payer to Provider Files

## Phase One I

Enrollment File

Event Tracking File (Gap Reports)

Chronic Condition File

## Phase Two

Utilization File

Cost and Risk Reporting File

# Enrollment File

## one record per patient

Payer	Patient Middle Name or Initial
Medical Group TIN*	Patient Date of Birth
Medical Group NPI*	Patient Sex
Clinic NPI*	Most Recent DOS
Provider NPI*	Attribution Type
Patient ID	Enrollment Months
Unique Medical Group Patient ID	Pharmacy Months
Patient Last Name	Previous Insurance Plan Member ID
Patient First Name	

\* At least 1 of 4 clinic/ medical group identifying fields must be provided (attribution methods may prevent all from being provided)

# Enrollment File

## Understand attribution by health plan

- All patients included; those enrolled or assigned to the medical group
- Attribution type is indicated
- One record per patient; 18 fixed columns

# Measure Event Tracking File

- Some measures/ conditions are “related”
  - diabetes + HTN + colonoscopy → more than 1 record per patient
- Measures for Phase 1

BCS	Breast Cancer Screening
CBP	Controlling High Blood Pressure
CCS	Cervical Cancer Screening
CHL	Chlamydia Screening in Women
CIS	Childhood Immunization Status
CDC	Comprehensive Diabetes Care
COL	Colorectal Cancer Screening
IMA	Immunizations for Adolescents
OTH1	Other Measure 1
OTH2	Other Measure 2
OTH3	Other Measure 3

# Chronic Conditions File

one record per actively enrolled patient per condition  
→ included if has at least one selected condition

Patient ID	Most Recent DOS

- Actively enrolled patient is only included if has one of the selected chronic conditions
- One row per condition

# Value Set to Support Clinical Conditions

Chronic Condition	Code	Description	Code Syst	Source of Definition
Heart Failure	1562974100011910	Systolic heart failure stage C due to ischemic cardiomyopathy (disorder)	SNOMED CT	NCQA HEDIS MY 2020
Heart Failure	1596470100011910	Acute cor pulmonale co-occurrent and due to saddle embolus of pulmonary artery (disord	SNOMED CT	NCQA HEDIS MY 2020
Depression	F32.0	Major depressive disorder, single episode, mild	ICD10CM	MNCM
Depression	F32.1	Major depressive disorder, single episode, moderate	ICD10CM	MNCM
Depression	F32.2	Major depressive disorder, single episode, severe without psychotic features	ICD10CM	MNCM
Depression	F32.3	Major depressive disorder, single episode, severe with psychotic features	ICD10CM	MNCM
Depression	F32.4	Major depressive disorder, single episode, in partial remission	ICD10CM	MNCM
Depression	F32.5	Major depressive disorder, single episode, in full remission	ICD10CM	MNCM
Depression	F32.9	Major depressive disorder, single episode, unspecified	ICD10CM	MNCM
Depression	F33.0	Major depressive disorder, recurrent, mild	ICD10CM	MNCM
Depression	F33.1	Major depressive disorder, recurrent, moderate	ICD10CM	MNCM
Depression	F33.2	Major depressive disorder, recurrent severe without psychotic features	ICD10CM	MNCM
Depression	F33.3	Major depressive disorder, recurrent, severe with psychotic symptoms	ICD10CM	MNCM
Depression	F33.40	Major depressive disorder, recurrent, in remission, unspecified	ICD10CM	MNCM
Depression	F33.41	Major depressive disorder, recurrent, in partial remission	ICD10CM	MNCM
Depression	F33.42	Major depressive disorder, recurrent, in full remission	ICD10CM	MNCM
Depression	F33.9	Major depressive disorder, recurrent, unspecified	ICD10CM	MNCM
Depression	F34.1	Dysthymic disorder	ICD10CM	MNCM
HIV	B20	[B20] Human immunodeficiency virus [HIV] disease	ICD10CM	NCQA HEDIS MY 2020
HIV	Z21	[Z21] Asymptomatic human immunodeficiency virus [HIV] infection status	ICD10CM	NCQA HEDIS MY 2020

# Next Steps

# Q&A/Discussion

Please type your questions into the “Q&A” box at the bottom of your screen

# Thank you!

**To request pilot project information:**  
Email [support@mncm.org](mailto:support@mncm.org) to request detailed standards.

**To volunteer for pilot testing:**  
Email [cinqeonce@mncm.org](mailto:cinqeonce@mncm.org).

## **Other upcoming events:**

- **February 17**, MNCM Mental Health Summit (virtual pre-conference event)
- **February 18**, MNCM Annual Conference (virtual event)
